MT4 for MAC

USER GUIDE

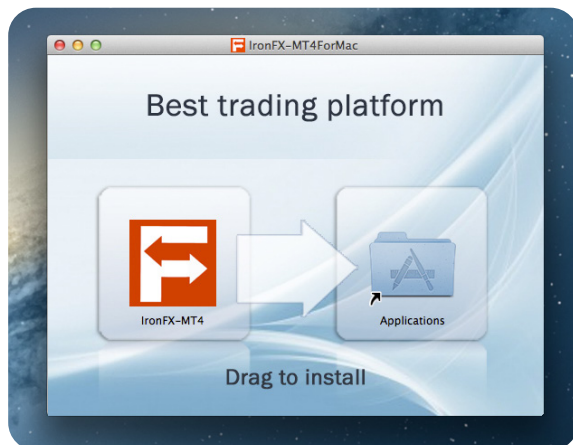

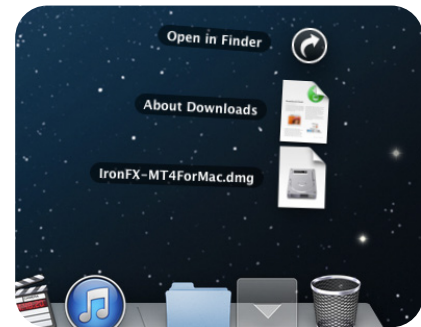

TABLE OF CONTENTS

- [1] HOW TO INSTALL MT4 FOR MAC
- [2] HOW TO ADD AN EXPERT ADVISOR OR CUSTOM INDICATORS TO YOUR METATRADER

[1] HOW TO INSTALL MT4 FOR MAC

Step 1: Download the **.DMG file** from our web site. Usually it will end up on your **Downloads** folder.

Step 2: Double-click on the **.DMG file** to open it.

Step 3: Generally you will just see the application that you'd like to install.

Step 4: Drag and drop it into your **“Applications”** directory.

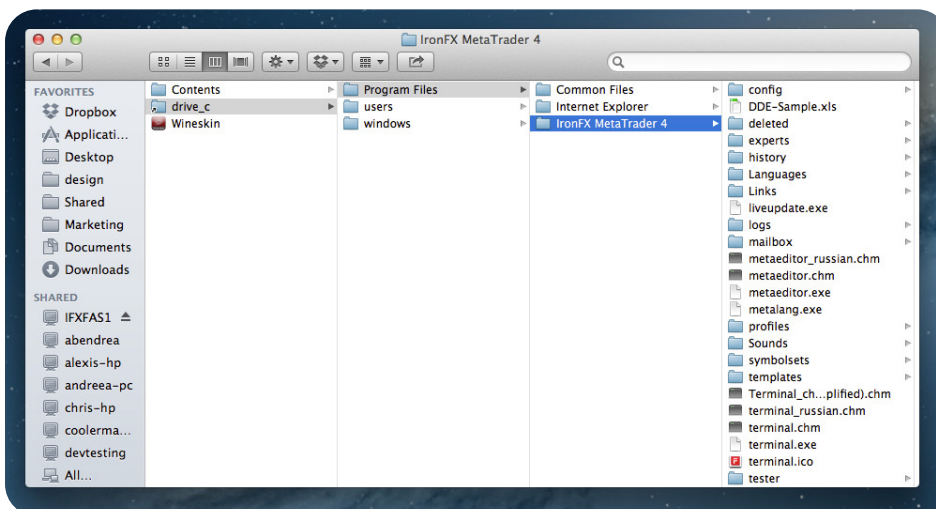

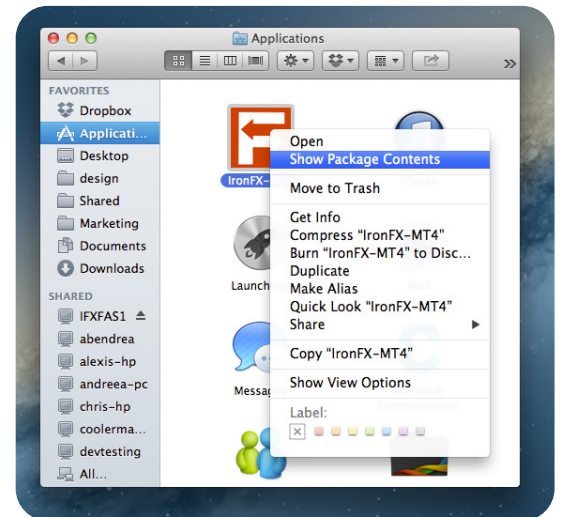

By default Apple has changed the security settings to only allow installation of apps from the Mac App Store and identified developers. To change this permanently or temporarily, please go to **“System Preferences > Security & Privacy”**.

On the General Tab click the little lock in the lower left corner to unlock the general preference pane. Then select the **“Anywhere”** radio button beneath.

[2] HOW TO ADD AN EXPERT ADVISOR OR CUSTOM INDICATORS TO YOUR META TRADER

Step 1: In your Applications folder right-click on Meta Trader and chose **"Show Package Contents"**.

Step 2: Open the folder following this path:
drive_c/Program Files/MetaTrader.

Step 3: The same way you do it in Windows insert the indicator, EA or other script.

Step 4: Start your Meta Trader and enjoy new scripts.
